RC𝑥 Rules

Are you looking to simplify and streamline your reimbursement process?

GBS' **RCx Rules** is an efficient and proven process that enables healthcare organizations to virtually eliminate denials that are based on inadequate data, thereby significantly increasing the velocity of payments and ensuring compliance.

Fueled by the industry's only advanced pre-billing process, our data-driven approach automatically fixes the issues—before they can detrimentally affect your revenue cycle.
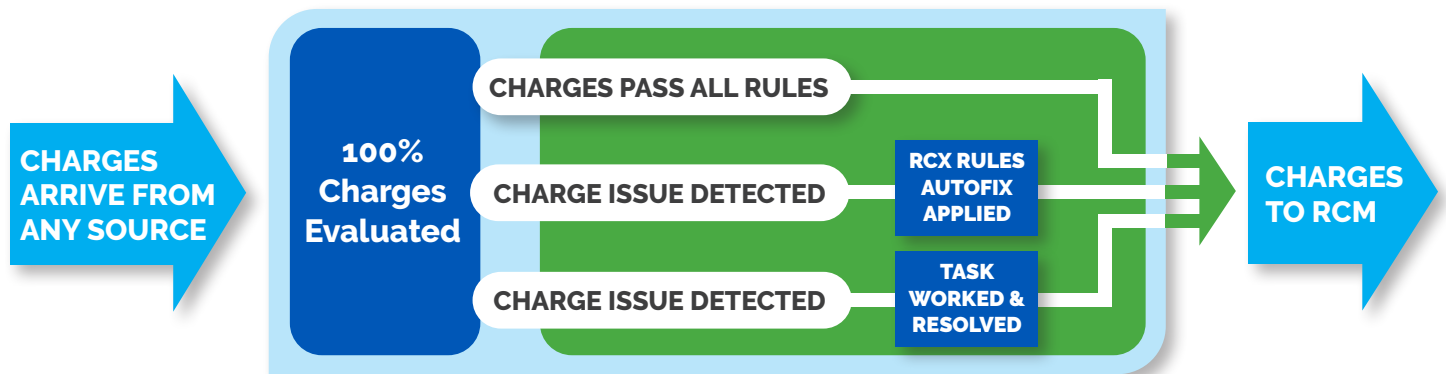

RCx Rules Can Help You Thrive by:

- Automating manual processes—reducing costs and simplifying processes
- Capturing the knowledge of your revenue cycle experts so everyone in the business office can perform at the highest level
- Automating EHR charge passing and cleaning billing data before it enters your revenue cycle system
- Supporting the shift to fee-for-service plus quality and value by providing clean and accurate data
- Providing you with the ability to create and maintain your own rules
- Enabling you to exclude specific charges from entering into the rules engine (i.e., zero-dollar charges)

Charge Automation RCx Rules:
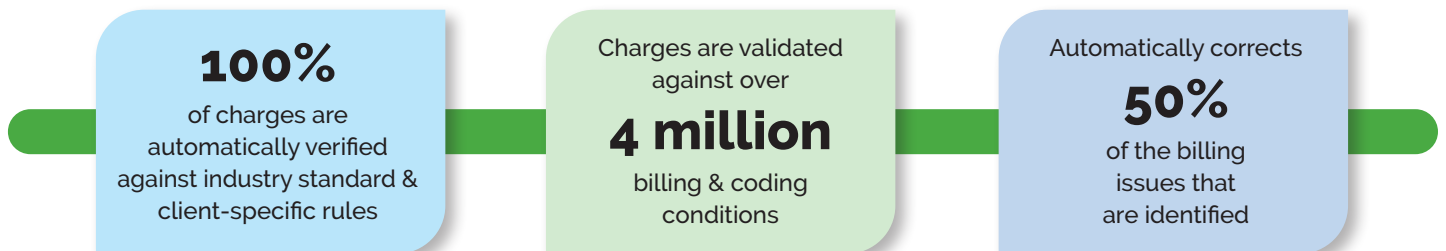

CLINICAL SYSTEM(S)	→CHARGE	**Customer Rules**		
		Global Rules	CLEAN & ACCURATE CHARGE→	REVENUE CYCLE MANAGEMENT SYSTEM
MANUAL CHARGE ENTRY	→CHARGE	**Industry Standard Rules**
